BULLETIN
OF THE
AMERICAN MUSEUM OF NATURAL HISTORY.

INDEX TO THE GENERIC NAMES IN VOLUME XXIX, DR.
PETRUNKEVITCH'S 'CATALOGUE OF SPIDERS OF
NORTH, CENTRAL, AND SOUTH AMERICA
AND ADJACENT ISLANDS.'

BY FRANK E. LUTZ, PH. D.,

Assistant Curator, Department of Invertebrate Zoölogy.

In his excellent Catalogue of Spiders of North, Central and South America (Bull. Amer. Museum Nat. History, Vol. XXIX), Dr. Petrunkevitch arranged the accepted generic names alphabetically within each family and in Part III gave an alphabetic list of synonyms but did not add the page numbers. Owing to the absence of a page index it is very difficult for those who are not well acquainted with the group to find a given genus. The following is submitted to meet this need.

INDEX TO VOLUME XXIX.

Accepted names of genera and subgenera are printed in roman, synonyms in italic, and names of cohorts in small caps.
