INTRODUCTION

"Bibliography is a most unrewarding occupation, because one tends to get blamed for what one has overlooked, rather than praised for what one has accomplished."

(G. F. Mees, 1969)

Compilation of this bibliography was originally started for my personal reference and use as an aid to my ornithological work on the Papuan Subregion avifauna. The geographical area covered is that referred to by Mayr in his *List of New Guinea Birds* (1941) as the New Guinea Region, and subsequently termed the Papuan Subregion by Rand and Gilliard in their *Handbook of New Guinea Birds* (1967). As the work was not initially intended for publication I continued to compile it slowly over the years, interrupted by travel and residence in Australia, Europe, the Indian Ocean, and Southeast Asia. As it progressed, however, it became obvious that the bibliography was becoming an increasingly useful research tool in itself, bringing together the widely dispersed literature on the New Guinea avifauna, and that its publication would provide a useful contribution to future ornithological work on the avifauna. With this, and the encouragement and enthusiasm of a number of other New Guinea ornithologists in mind, I decided in 1976 to put together a final manuscript and publish it. The bibliography was compiled with the present-day New Guinea ornithologist in mind and I have, therefore, retained its original form and function in the final product. The bibliography is thus compiled, annotated, and cross-referenced with the working ornithologist's needs being the first consideration. I decided, from the beginning, to include literature only from a time subsequent to the majority of purely or very predominantly descriptive ornithology, but also from a time when more ecological and behavioral work commenced in New Guinea. To define such a period of transition is difficult, and so I have used 1915 as a convenient starting point. The publication of the results of the British Ornithologists' Union Expedition (1909-1913) to Dutch New Guinea in that year (Ogilvie-Grant,

1915) provides a historically noteworthy and a suitable point of advancement in New Guinea ornithology. It is particularly suitable because Ogilvie-Grant provides in the introduction to his account a list of over 175 "principal papers relating to the birds of New Guinea; including the Kei and Aru Islands," covering the years 1858-1915. This list provides a quick reference into the literature pre-dating 1915.

As the bibliography is primarily for the working ornithologist not having ready access to good library facilities, I have been very broad-minded as to what titles I have included. Thus, a number of publications of perhaps questionable significance, or use, to New Guinea ornithology are included. My thinking behind this is that, for example, a worker studying New Guinea ratites who comes across the title *Emus in New Guinea* (see no. 148) need simply to check the bibliography entry to gain some indication of the significance of the paper before going to greater expense of time and money to see or obtain a copy. At the other extreme some very generalized publications, such as works dealing with the birds of prey, pigeons, parrots, or owls of the world are included for similar bibliographic reasons. A worker reviewing the owls of New Guinea need not be aware of Burton's recent book (see no. 143), but he might, not unreasonably, expect to find reference to it in a bibliography to New Guinea birds. Moreover, the inclusion of such generalized, but taxonomically restricted, works makes the systematic cross-reference section of this bibliography considerably more comprehensive and meaningful. Certainly, the worker wishing to know of the available literature on the parrots of New Guinea would be badly mislead if Forshaw's book (no. 274) were not included herein!

A problem concerning my broad selection of

titles for incorporation is defining the point at which papers do not warrant inclusion. It could be argued that many additional titles dealing with the New Guinea avifauna in a fragmentary way should be included. Good examples are the volumes of Peters's *Check-list of Birds of the World* which include New Guinea taxa, as well as some very predominantly New Guinea families. As already stressed, however, the bibliography is for the use of the working ornithologist and is not offered as an example of meticulous bibliographic comprehensiveness. Whilst I do not expect ornithologists to be aware of the titles and content of the increasingly large number of bird books being produced annually, I must assume that users of this work of reference are familiar with cornerstones of ornithology such as Peters's check-list, Thomson's *New Dictionary* and many others.

The majority of the most recent revision of the included literature and its cross-referencing was carried out during a visit to the American Museum of Natural History early in 1976. The compilation and production of the final manuscript was performed in Thailand during 1977 to the end of June. Thus, whilst it is hoped that the bibliography is fairly complete to the end of 1976 only those 1977 publications known to me in June are incorporated into the author list; whilst those I find subsequent to that time will be added to an addenda, herein, in an attempt to have the bibliography as up-to-date as possible up to the time it reaches the editor. A point was reached at which titles had to be given numbers in order to cross-reference and extract systematic and geographical subject content; this point was June 1977.

Because the preparation of the final manuscript was done in the relative isolation of southern Thailand I have had to depend to some extent on friends and colleagues for help (see Acknowledgments) in filling quite a number of gaps. Such gaps varied from merely the pagination of a title, or its translation, to having them provide me with the full title and journal reference as well as an annotation. Thus, whilst the vast majority of all details and annotation content are my own, some are by others. This has doubtless resulted in some inconsistencies and inaccuracy of detail, which I would ask the reader to point out. This is a first attempt to provide a useful bibliography to New Guinea ornithology. It is hoped that a subsequent revised and up-dated edition will appear at some future time which will be considerably more comprehensive, and thus useful, as a result of additions and corrections provided by users of the present contribution.

The following figures indicate the numbers of publications included in this bibliography, at the time of writing, that were published in five-year periods since 1915. When we take into account the effect of world wars on the production of publications, these figures show a steady increase in work on New Guinea birds. The more recent, and particularly, the present interest in the birds of this area as indicated by publication numbers is truly remarkable.

1915–1919 = 32	1950–1954 = 52
1920–1924 = 43	1955–1959 = 90
1925–1929 = 53	1960–1964 = 70
1930–1934 = 90	1965–1969 = 121
1935–1939 = 78	1970–1974 = 167
1940–1944 = 66	1975–1977 = 142
1945–1949 = 26	

CONVENTIONS

TITLE REFERENCE NUMBER

Each title, listed in alphabetical order of author(s), is given a reference number. These numbers are printed below the author(s) name and appear in other parts of this work where reference is made to the publications.

THE TITLES

These appear as worded in the original publication, with the exception that I have given all scientific names in italics regardless of the printed form in the original. In addition I have capitalized the first letter of each word in the

full vernacular names of birds. For example: Crested Tern, White-shouldered Wren, Black-backed Least Bittern, etc. This I do for consistency, and because I believe this is the best way to deal with the problem of vernacular names, and that it should be standard practice.

For the convenience of users of this bibliography and for reference I have continued to prefix the title of certain American Museum of Natural History publications with "Birds of the Whitney South Sea Expedition no. ____" despite the fact that this information was given as a footnote on later publications in this series.

Also note that in the case of one or two publications the same title appears under two authorships (e.g., nos. 916 and 928), because these publications have been referred to differing authorship in some of the literature.

THE JOURNALS

Journal abbreviations used in this bibliography are those used in the *World List of Scientific Periodicals*, fourth edition, Butterworth, London, 1963, with the exception that I use Amer., not Am., as an abbreviation of American. Where I could find no abbreviation for a particular journal in the *World List* I used the "list of abbreviations" therein to form one; thus, for example, Explor. Soc. Aberd. Univ. Un. (of no. 31 and 33).

I have not used *Ibid.*, to indicate the same journal or publication as that in which the preceding title appears for a number of reasons. Firstly, this would have made the incorporation of additional titles into the bibliography at a later point extremely inconvenient and difficult as in the case of inserting a title from a particular journal into a long series of titles all from a second journal, this would mean repeated and lengthy retyping of pages of the manuscript. Secondly, in a larger bibliography of this nature it is far more helpful to be able to find the full reference under each title without having to search a page or pages in order to find the journal name. The latter is both frustrating and damaging to the bibliography; the resulting wear diminishes the working life of the publication.

THE ANNOTATIONS

Annotations for the publications are extremely variable in length and in the degree to which they indicate the subject content and scope of the papers. This is inevitable in a bibliography which aims to annotate the titles with the present-day working ornithologist in mind. Moreover, space has been a governing factor throughout this work. Thus, in most cases, I give no more than a translation to titles originally published in languages other than English. In cases where a remark is made additional to the translation, I use square parentheses. No annotation is provided where I believe the title itself gives an adequate indication of subject matter. It should be particularly noted that in this respect the inclusion of a Latin name or names in a title of a paper is very useful in a bibliography and will help compilers such as myself, the Zoological Record, and others concerned with zoological abstracts to correctly, and with minimal work, place a title taxonomically. I believe this should be editorial policy in ornithological journals at least.

An important major work on the birds of an area that includes descriptions of new forms usually will be annotated by a list of subtitles but the new names erected not given (unless there are only one or two); whereas a brief paper describing a new subspecies only will be annotated by the new name and perhaps its locality or range. These intended inconsistencies are unavoidable owing to limited space, but I hope the annotations prove useful to the ornithologist despite these limitations.

The annotations deal only with the subject matter concerning the Papuan Subregion. Thus, the annotation of papers, such as a number of the "Birds of the Whitney South Sea Expedition" which deal with birds of that area as well as those from elsewhere, will include only details on birds of the Papuan Subregion.

Some indication of the number of plates, photographs, figures, and maps appearing in publications is given as such information is often useful to the ornithologist concerned with the production of bird plates for books, the

geographical distribution of forms, the history of ornithological exploration, etc. In this respect I refer to a map specifically as such although the map may in fact appear as a "figure" in the publication.

THE NOMENCLATURE

All Latin names given in the titles are, of course, as they appear in the original publication. Names used by authors which do not differ from the usage of Rand and Gilliard in their *Handbook of New Guinea Birds* appear without remark or additions. For the convenience of present workers I have, however, included the name used by Rand and Gilliard in square parentheses within the annotation when this name differs from the original used in the publication. Similarly names referred to in the annotations as written by the authors are followed by that of Rand and Gilliard, where they differ, in square parentheses. Thus, whilst the publication title *Some new birds from New Guinea* does not include the new names, these often will (if not too many) be found in the annotation and will be followed by the name used by Rand and Gilliard in square parentheses if different from the name erected in the publication.

ABBREVIATIONS

To save space, a number of frequently used words within the annotations, or words commonly abbreviated elsewhere have been abbreviated as indicated below. The names of the months and the points of the compass have been abbreviated in the usual manner. First, second, third, are abbreviated as usual; e.g., 1st, 2nd, 3rd.

annot.	annotated

ACKNOWLEDGMENTS

Having compiled this work over a considerable period of time, and often over considerable distances, I owe very much to very many people for help and encouragement in various ways.

Firstly, I thank Ms. Diane Macdonell, Ms. Christine Smith, and Ms. Kathie Way for assistance and encouragement during the early development of the bibliography.

The following friends and colleagues have kindly provided me with suggestions, corrections, additions, translations and/or reprints which have greatly facilitated and often improved the production of the bibliography:

Ms. Cecily Allen, Lt. Col. Harry Bell, Mr. C. W. Benson, Mr. Murray Bruce, Mr. Frank Denton, Dr. Jared Diamond, Mr. Ian Galbraith, Mr. Graeme George, Mr. Derek Goodwin, Dr. Colin Harrison, Ms. Mary Haynes, Brother Matthew Heron, Mr. Harry Horswell, Mr. Augustine Jones, Ms. Mary LeCroy, Mr. Eric Lindgren, Mr. Roy Mackay, Mr. John McKean, Dr. Gerlof Mees, Ms. Jette Nybroe, Mr. Shane Parker, Mr. William Peckover, Dr. Richard Schodde, the late Mr. Hobart Van Deusen, Mrs. Inez and Mr. Tom Weston. To these people I owe much.

In addition many ornithologists working on the New Guinea avifauna, too numerous to name here, sent reprints to me in my isolation

from larger libraries. These have obviously been of very great value, and I thank all those concerned.

To the librarians and staff of the following societies and institutions I am particularly grateful for the privilege of permission to work in, or use, their literature stocks:

The American Museum of Natural History, New York, general and ornithological libraries.

Avicultural Society, London.

British Museum of Natural History, London, general, zoological and sub-department of ornithology (Tring, Hertfordshire) libraries.

British Ornithologists' Club, London.

Defense Mapping Agency, Washington (specifically Frank T. Nicoletti).

National Museum of Natural History, Smithsonian Institution, Washington, division of birds library.

Papua New Guinea Bird Society, Port Moresby.

Royal Australasian Ornithologists' Union, Melbourne.

I am particularly indebted to my parents for their encouragement, and for accommodating me during visits to London and for housing much material in my absence. My wife, Dawn, has provided continuous support and encouragement throughout the past five years with a determination, often greater than my own, to see the increasingly laborious task completed.

Finally, I gratefully acknowledge the considerable interest, encouragement, and help of a number of dedicated ornithologists who have provided valuable correspondence throughout most of the bibliography preparation. Among these are most of the longer-term members of the Papua New Guinea Bird Society, including Mr. Roy Mackay, Mr. William Peckover, and Mrs. Inez Weston; but in particular Lt. Col. Harry Bell who has provided prolific correspondence and numerous references over a number of years. To Dr. Jared Diamond I owe

particular thanks for valuable advice, criticism, and literature over several years.

Mr. Murray Bruce, with his remarkable encyclopedic knowledge of the ornithological literature of the Australasian area, has been a great help to me. His correspondence subsequent to examining an early draft of the bibliography resulted in a large increase in the number of titles. In addition, he unhesitatingly gave freely of his limited time at the American Museum of Natural History to discuss the bibliography at length, as well as subsequently filling many gaps remaining in the draft.

Ms. Mary LeCroy, of the Ornithology Department of the American Museum of Natural History, has been extremely helpful in providing me with valuable literature, as well as a constant flow of up-to-date information on New Guinea ornithological developments and useful suggestions. I am particularly grateful to her for providing additions, translations, and comments to both an early draft and the final manuscript without which I could not have completed the work. For this, and her great kindness and hospitality to me and my wife during our visit to New York, I am very grateful. In addition, I thank Ms. Ivy Kuspit, who typed the final manuscript.

I acknowledge with thanks financial support from the Frank M. Chapman Memorial Fund, administered by the American Museum of Natural History, which provided funds for other ornithological studies in New York and which also enabled me to carry out additional work on the bibliography there.

The Papua New Guinea Bird Society presented me with a sum to assist with personal costs, which more than covered the cost of a final typescript production, while the manuscript was in the hands of the American Museum of Natural History; and for this noteworthy interest in the project and New Guinea ornithology, I am particularly grateful.

590. 1950. Artbildung und Variation in der *Halcyon-chloris*-Gruppe. Orn. Biol. Wiss. (Festschrift zum 60. Geburtstag von Erwin Stresemann), pp. 55-60.
(Speciation and variation in the *Halcyon chloris* group. See also no. 672.)
591. 1953. Fragments of a Papuan ornitho-geography. Proc. Pacif. Sci. Congr. 1949, vol. 4, pp. 11-19.
(Subts. = Zoogeographic position of N.G. bird fauna [incl. generic analysis of affinities], Differences between birds and plants, Causes for contact between plants and birds, History of N.G. biota, Continental drift and the Papuan biota.)
592. 1955. Birds collected during the Whitney South Sea Expedition. 63, Notes on the birds of Northern Melanesia 3. Passeres. Amer. Mus. Novitates, no. 1707, pp. 1-46.
(Mostly concerned with radiation of some members of 16 families. Notes presence of a few forms in N.G., their characters and part played in dispersal/colonization. Limited N.G.)

- data. For other "Notes on the birds of N. Melanesia" see nos. 586, 589, 593.)
593. 1957a. Birds collected during the Whitney South Sea Expedition. 64, Notes on the birds of Northern Melanesia 4. Amer. Mus. Novitates, no. 1823, pp. 1-14.
 ("The genus *Accipiter*." Almost nothing on N.G., but 2 of 6 pls. figure N.G. skins of *A. melanochlamys*. For other "Notes on birds of N. Melanesia" see nos. 586, 589, 592.)
594. 1957b. New species of birds described from 1941 to 1955. J. Orn., Lpz., vol. 98, pp. 22-35.
 (Incl. discussion of 3 N.G. forms. See also nos. 597, 998.)
595. 1967. The challenge of island faunas. Aust. Nat. Hist., vol. 15, pp. 369-374.
 (General discussion of Australasian area, incl. N.G. birds. 1 map.)
596. 1969. Bird speciation in the tropics. Biol. J. Linn. Soc., vol. 1, pp. 1-17.
 (Mostly giving examples on N.G. or adjacent islands. 6 figs.)
597. 1971. New species of birds described from 1956 to 1965. J. Orn., Lpz., vol. 112, pp. 302-316.
 (Incl. discussion of 2 N.G. forms. See also nos. 594, 998.)
- Mayr, E., and D. Amadon
 598. 1941. Birds collected during the Whitney South Sea Expedition. 46, Geographical variation in *Demigretta sacra* (Gmelin). Amer. Mus. Novitates, no. 1144, pp. 1-11.
 (Examines size and color phases over extensive range incl. N.G. Also list of specimens in Amer. Mus. Nat. Hist. 1 map.)
599. 1947. A review of the Dicaeidae. Amer. Mus. Novitates, no. 1360, pp. 1-32.
 (Comprehensive review dealing with the family, its distribution, position, plumage and dimorphism, habits and adaptations, genera and spp., and evolution. 8 figs. See also nos. 568, 798, 799, 800, 801.)
- Mayr, E., and J. Berlitz
 600. 1933. Note critique sur les sous-espèces de *Goura victoria*. Oiseau Revue fr. Orn., vol. 3, pp. 751-754.
- (Note on the subspecies of *Goura victoria*.)
- Mayr, E., and S. Camras
 601. 1938. Birds of the Crane Pacific Expedition. Publ. Field Mus. Nat. Hist., Zool. Ser., vol. 20, pp. 453-473.
 (Subt. "Papuan Subregion" incl. list of specimens with discussion on certain spp. *Nettapus coromandelianus* 1st. record for N.G. *Mirafra javanica sepikiana* and *Lichmera alboauricularis olivacea* described. For popular account of this exped. see no. 840.)
- Mayr, E., and E. T. Gilliard
 602. 1950. A new bower bird (*Archboldia*) from Mount Hagen, New Guinea. Amer. Mus. Novitates, no. 1473, pp. 1-3.
 (*A. papuensis sanfordi* described. See also no. 607.)
603. 1951. New species and subspecies of birds from the highlands of New Guinea. Amer. Mus. Novitates, no. 1524, pp. 1-15.
 (1 sp. and 16 spp.; from Hagen, Bismarck and Kubor mts. See also nos. 303, 304, 602, 605, 607.)
604. 1952a. The Ribbon-tailed Bird of Paradise (*Astrapia mayeri*) and its allies. Amer. Mus. Novitates, no. 1551, pp. 1-13.
 (Summary of current knowledge in all aspects, with new description and diagnosis given. Genus as a whole dealt with; some measurements. 2 maps.)
605. 1952b. Six new subspecies of birds from the highlands of New Guinea. Amer. Mus. Novitates, no. 1577, pp. 1-8.
 (From Hagen, Bismarck and Kubor mts. Introduction of new name *Turdus poliocephalus erebus* to replace preoccupied *T. p. carbonarius* proposed in no. 603. See also nos. 303, 304, 607.)
606. 1952c. Altitudinal hybridization in New Guinea honeyeaters. Condor, vol. 54, pp. 325-337.
 (Discusses and describes hybrid zones in the *Melidectes leucostephes-belfordi* group, and their origins. 4 figs. See also no. 318.)
607. 1954. Birds of Central New Guinea. Results of the American Museum of Natural History Expedition to New

- Guinea in 1950 and 1952. Bull. Amer. Mus. Nat. Hist., vol. 102, pp. 315-374.
(Important paper. Subts. = Summary of results; Itinerary; Ecological, geographical and anthropological notes; Conservation and paradise plume collecting today; Types of habitat and birds typical of each; Effect of man upon the altitudinal distribution of some N.G. birds; Zoogeographical affinities of Wahgi Region birds; Annotated list of birds of the Central Highlands [incl. weights, measurements and field notes]. 22 pls., of 37 photos. of birds or their display areas and 8 of habitats, 1 map. See also nos. 303, 306, 602, 603, 605.)
- Mayr, E., and K. Jennings
608. 1952. Geographic variation and plumages in Australian bowerbirds (Ptilonorhynchidae). Amer. Mus. Novitates, no. 1602, pp. 1-8.
(A few measurements of, and odd ref. to, N.G. forms. A brief discussion of relationship between *Sericulus* and *Xanthomelus*, it being suggested that the latter be placed into former. 1 pl.)
- Mayr, E., and R. Meyer de Schauensee
609. 1939a. Zoological results of the Denison-Crockett expedition to the South Pacific for the Academy of Natural Sciences of Philadelphia 1937-1938. Part 1. The birds of the island of Biak. Proc. Acad. Nat. Sci. Philad., vol. 91, pp. 1-37.
(On collections made by S. D. Ripley during Nov.-Dec. 1937. Subts. = Ripley's account of Biak, Ornithological history of Biak, Speciation of birds on Biak, Origin of avifauna of Biak, Trends of variation on Biak, List of birds [seen and/or collected by Ripley and others]. Field notes, measurements and weights. 1 ssp. described. 1 map, 4 photos. For other results of this exped. see nos. 610, 611, 650, 651, 733.)
610. 1939b. Zoological results of the Denison-Crockett South Pacific expedition for the Academy of Natural Sciences of Philadelphia 1937-1938. Part 4.
- Birds from Northwest New Guinea. Proc. Acad. Nat. Sci. Philad., vol. 91, pp. 97-144.
(Reports on collections from N. Vogelkop, Sorong and surrounding islands and mainland. Annot. spp. list, section on history of collecting in area. 1 map, 3 pls. For other results of this exped. see nos. 609, 611, 650, 651, 733.)
611. 1939c. Zoological results of the Denison-Crockett South Pacific expedition for the Academy of Natural Sciences of Philadelphia 1937-1938. Part 5. Birds from the Western Papuan Islands. Proc. Acad. Nat. Sci. Philad., vol. 91, pp. 145-163.
(Subts. = Collection of birds from Misol and the Schildpad Is. [collected by S. D. Ripley]; Collection of birds from Salawati and Sagewin Is., Collection of birds from Batanta [collected by 2 local men, Joseph and Saban]. Spp. lists under subts. incl. field notes, weights and measurements. 1 map. For other results of this exped. see nos. 609, 610, 650, 651, 733.)
- Mayr, E., and M. Moynihan
612. 1946. Birds collected during the Whitney South Sea Expedition. 56, Evolution in the *Rhipidura rufifrons* group. Amer. Mus. Novitates, no. 1321, pp. 1-21.
(Comprehensive review of speciation with discussion on ecological isolation and speciation.)
- Mayr, E., and A. L. Rand
613. 1935. Results of the Archbold Expeditions. no. 6, Twenty-four apparently undescribed birds from New Guinea and the D'Entrecasteaux Archipelago. Amer. Mus. Novitates, no. 814, pp. 1-17.
(1 sp. and 23 spp. described. Status of forms of *Malurus alboscipulatus* discussed at some length. See also no. 617.)
614. 1936a. Results of the Archbold Expeditions. No. 10, Two new subspecies of birds from New Guinea. Amer. Mus. Novitates, no. 868, pp. 1-3.
(*Excalfactoria chinensis papuensis* and *Microdynamis parva griseocincta*.)

615. 1936b. Neue Unterarten von Vogeln aus Neu-Guinea. Mitt. Zool. Mus. Berl., vol. 21, pp. 241-248.
(New subspecies of birds from New Guinea.)
616. 1936c. Vorläufiges über die Ergebnisse der Archbold-Rand Neu-Guinea-Expedition von 1933. Orn. Mber., vol. 44, pp. 41-44.
(Preliminary results of the Archbold-Rand New Guinea Expedition of 1933.)
617. 1937. Results of the Archbold Expeditions. 14, Birds of the 1933-1934 Papuan Expedition. Bull. Amer. Mus. Nat. Hist., vol. 73, pp. 1-248.
(Annot. list of specimens collected in S.E. and S.N.G. in 1933-34; and also by J. T. Zimmer [S.E. N.G. 1920-21], Whitney Exped. [S.E. N.G. 1928-29] and R. H. Beck [E. N.G. 1928]. Locality lists of the latter 3 expeds. given. Deals with 445 forms, giving notes on plumage, status and field notes and some measurements. For other results of this exped. see nos. 56, 155, 613, 707, 708.)
- Mayr, E., and S. D. Ripley
618. 1941. Birds collected during the Whitney South Sea Expedition. 44, Notes on the genus *Lalage* Boie. Amer. Mus. Novitates, no. 1116, pp. 1-18.
(Systematic revision, mostly of the Polynesian forms, but dealing with the 3 N.G. spp. Generic characterization and synonymy discussed and the history of the genus examined at length. See also no. 782.)
- Mayr, E., and D. L. Serventy
619. 1938. A review of the genus *Acanthiza* Vigors and Horsfield. Emu, vol. 39, pp. 245-292.
(N.G. *A. murina* considered nearest to ancestral type. Also mention of this sp. in association with *Gerygone cinerea* and *Sericornis nouhuysi*.)
620. 1944. The number of Australian bird species. Emu, vol. 44, pp. 33-40.
(Figures for N.G. given and comparative land mass/spp. no. ratio discussed.)
- Mayr, E., and H. M. Van Deuse
621. 1956. Results of the Archbold Expeditions. No. 74, The birds of Goodenough Island, Papua. Amer. Mus. Novitates, no. 1792, pp. 1-8.
- (Composition of, and remarks on, the mountain avifauna. Notes on lowland avifauna and history of collecting on Goodenough. *Pachycephala soror remota* described. 1 map. For other results of the exped. see nos. 128, 129.)
- Mayr, E., and C. Vaurie
622. 1948. Evolution in the family Dicruridae (Birds). Evolution, vol. 2, pp. 238-265.
(Detailed analysis of morphological characters, incl. all N.G. forms. 7 figs. See also no. 955.)
- McClure, H. E.
623. 1974. Migration and survival of the birds of Asia. Bangkok. U.S. Army Component SEATO Medical Research Laboratory. v + 476 pp.
(Incl. a number of N.G. banding recoveries; and describes major migratory routes in the area. 249 figs., mostly maps.)
- McGill, A. R.
624. 1948. A distributional review of the genus *Neositta*. Emu, vol. 48, pp. 33-52.
(Brief mention of *N. papuensis* only.)
625. 1970. Australian Warblers. Melbourne. Bird Observers' Club. 147 pp.
(Fine account of ecology and identification, incl. many spp. also in N.G. particularly of *Gerygone* and *Sericornis beccarii*. 12 col. pls., 84 maps.)
- McKean, J. L.
1972. See no. 822.
1973. See nos. 823, 824.
- McKean, J. L., and D. P. Vernon
626. 1971. New records of tube-nosed birds (Order Procellariiformes) from Queensland. Mem. Qd. Mus., vol. 16, pp. 141-143.
(Incl. record of live *Pterodroma rostrata* captured off Port Moresby, N.G., as well as 1st. Aust. record of same. 4 pls.)
- McVean, D. N.
1969. See no. 963.
- Medway, Lord
627. 1966. Field characters as a guide to the specific relations of swiftlets. Proc. Linn. Soc. London, vol. 177, pp. 151-172.
(Covers N.G. spp. of *Collocalia*.)
- Meek, A. S.
See no. 401.

- Mees, G. F.
628. 1953. The white-eyes of the Aroe Islands, (Aves, Zosteropidae). *Zool. Meded.*, Leiden, vol. 32, pp. 25-30.
(Systematic discussion. *Zosterops novaeguinea aruensis* described. 1 pl.)
629. 1955. Description of a new race of *Zosterops novaeguineae* Salvadori (Aves, Zosteropidae). *Zool. Meded.* Leiden, vol. 34, pp. 153-154.
(*Z. n. magnirostris* from Awar, N.E. N.G.)
630. 1957a. A systematic review of the Indo-Australian Zosteropidae (Part 1). *Zool. Verh.*, Leiden, no. 35, pp. 1-204.
(Check list of Indo-Aust. forms and general remarks on family and methods of present study. Does not deal specifically with N.G. forms. 1 pl., 10 figs. See also nos. 628, 629, 634, 642, 909.)
631. 1957b. Over net belang van Temminck's "Discours Preliminair" voor de Zoologische Nomenclatuur. *Zool. Meded.* Leiden, vol. 35, pp. 205-227.
(On the significance of Temminck's . . . etc. [Incl. discussion of type locality, geographical variation and nomenclature of *Probosciger aterrimus*.])
632. 1958a. Een bastaard tussen *Lonchura tristissima* (Wallace) en *L. leucosticta* (D'Albertis and Salvadori). Nova Guinea, new ser., vol. 9, pp. 15-19.
(A hybrid between . . . and . . . etc.)
633. 1958b. Het ornithologisch belang van de bosreserve "Tafelberg" te Manokwari (Nederlands New Guinea). *Oost en West*, vol. 51, pp. 15-17.
(The ornithological significance of the forest reserve "Tafelberg" at Manokwari (Dutch N.G.). [List of spp. observed in Jan. 1957].)
634. 1961. A systematic review of the Indo-Australian Zosteropidae (Part 2). *Zool. Verh.*, Leiden, no. 50, pp. 1-168.
(Important; deals with all N.G. forms very comprehensively in all respects, including exhaustive synonymy. 4 pls., 13 figs. See also nos. 628, 629, 630, 642, 909.)
635. 1962. Letter to the Editor. *Emu*, vol. 62, p. 220.
(Corrects identification of *Zosterops novaeguineae* in Wau area [see no. 968] to *Z. atrifrons chrysolaema* [= *Z. minor chrysolaema*].)
636. 1964a. Four new subspecies of birds from the Moluccas and New Guinea. *Zool. Meded.* Leiden, vol. 40, pp. 125-130.
(3 from N.G. area.)
637. 1964b. A revision of the Australian owls (Strigidae and Tytonidae). *Zool. Verh.*, Leiden, no. 65, pp. 1-62.
(N.G. forms of *Ninox rufa*, *N. novaezelandiae*, *N. connivens* and *Tyto tenebricosa* discussed, incl. measurements. 1 col. pl., 8 maps.)
638. 1964c. Notes on two small collections of birds from New Guinea. *Zool. Verh.*, Leiden, no. 66, pp. 1-37.
(From Star Mts. [see nos. 134, 135] and Merauke area. Annot. list of specimens. *Rhamphocaris crassirostris interposita* described. 1 map.)
639. 1965a. Revision of *Nectarinia sericea* (Lesson). *Ardea*, vol. 53, pp. 38-56.
(Incl. all N.G. forms. *Nectarinia sericea veronica* described. 1 map, 1 fig. See no. 641.)
640. 1965b. The avifauna of Misool. Nova Guinea, *Zool.*, vol. 31, pp. 139-203.
(Important and comprehensive review. Subts. = History of collecting, Analysis of the avifauna, Faunal affinities. An annot. list of forms. *Goura cristata pygmaea* described. 1 map, 1 fig., 4 pls.)
641. 1966. A new subspecies of *Anthreptes malaccensis* (Scopoli) from the Soela Islands (Aves, Nectariniidae). *Zool. Meded.*, Leiden, vol. 41, pp. 255-257.
(Notes that *Nectarinia sericea* is preoccupied [see nos. 357, 639] and that *N. aspasia* is the next available name.)
642. 1969. A systematic review of the Indo-Australian Zosteropidae (Part 3). *Zool. Verh.*, Leiden, no. 102, pp. 1-390.
(Contains additions and corrections to Part 1 [no. 630] in 36 pp. and to Part 2 [no. 634] in 20 pp. The summary and conclusions include "A revised list of the Indo-Aust.

- Zosteropidae" and 21 other subts., most of which deal with specific characters, or aspects, of the family. 28 figs. See also no. 909.)
643. 1972. Die Vögel der Insel Gebe. Zool. Meded., Leiden, vol. 46, pp. 69-89. (The birds of the island of Gebe. [Composition and systematics. Annot. list and some measurements.] 1 map.)

753. 1921b. On some birds from the Weyland Mountains, Dutch New Guinea. Novit. Zool., vol. 28, pp. 280-294.
(Describes small collection made Oct. 1920 to Jan. 1921, mostly from Mt. Kunupi. 1 ssp. described.)
754. 1921c. A new species of *Paradisaea*: *P. mixta*. Bull. Br. Orn. Club, vol. 41, p. 127.
(= *P. minor finschi* X *P. apoda augustaevictoriae* hybrid.)
755. 1921d. On *Paradisaea apoda granti*. Bull. Br. Orn. Club, vol. 41, p. 127.
(= *P. raggiana granti*.)
756. 1921e. A new bird of paradise: *Paradisaea apoda subintermedia*. Bull. Br. Orn. Club, vol. 41, pp. 138-139.
(= *P. raggiana granti*.)
757. 1922. On the names of certain parrots of the genus *Larius* Bodd. = *Eclectus* Wagl. Ann. Mag. Nat. Hist., vol. 9, pp. 411-412.
(Discusses systematics of *Larius*.)
758. 1923. Remarks on intermediate specimens between *Paradisaea apoda raggiana* and *P. a. novaeguinea*. Bull. Br. Orn. Club, vol. 43, pp. 115-117.
(= *P. r. raggiana* and *P. a. novaeguinea*.)
759. 1925. A new form of cassowary: *Casuarius casuarius lateralis*. Bull. Br. Orn. Club, vol. 46, p. 30.
760. 1926. On one-wattled cassowaries. Bull. Br. Orn. Club, vol. 47, pp. 26-28.
(Discussion of systematics and distribution of *Casuarius unappendiculatus* group.)
761. 1928a. Description of a new cassowary. Bull. Br. Orn. Club, vol. 48, pp. 87-88.
(*Casuarius rogersi* [= *C. bennetti papuanus*].)
762. 1928b. A new ground pigeon: *Otidiphaps nobilis aruensis*. Bull. Br. Orn. Club, vol. 48, p. 88.
763. 1928c. A new race of cassowary: *Casuarius bicarunculatus intermedius*. Bull. Br. Orn. Club, vol. 49, pp. 9-10.
(= *C. casuarius tricarunculatus*.)
764. 1929. Exhibition of drawings on cassowaries and remarks thereon. Bull. Br. Orn. Club, vol. 50, pp. 5-6.
(Points out that B.O.U. N.G. exped. [see no. 675] proved *Casuarius bicarunculatus* [= *C. c. bicarunculatus*] and *C. casuarius* to be 2 spp. States *C. beccarii* [= *C. c. aruensis*] on the Aru Is. Comments on soft-part colors of *C. unappendiculatus aurantiacus*. Drawing of a bird near *C. c. violicollis* [= *C. c. aruensis*] described as a possible color aberration.)
765. 1930a. Notes on the preceding article by Dr. Stresemann. Novit. Zool., vol. 36, pp. 16-17.
(Remarks on nos. 907, 911.)
766. 1930b. On the three known species of *Xanthomelus*. Bull. Br. Orn. Club, vol. 50, p. 33.
(Remarks on plumages of *X. aureus*, *X. a. ardens*, and *X. bakeri*.)
767. 1930c. Exhibition of birds-of-paradise and remarks thereon. Bull. Br. Orn. Club, vol. 50, pp. 38-40.
(Discussion of those Paradisaeidae known by a single specimen.)

768. 1930d. On the hitherto unknown eggs of the Paradise Crow (*Lycocorax pyrrhopodus pyrrhopodus*) and *Phonygammus keraudrenii keraudrenii*. Bull. Br. Orn. Club, vol. 51, p. 9. (Eggs described and *Phonygammus* reported to be parasitic upon *Paradisaea apoda*. See also no. 375.)
769. 1930e. Exhibition of eggs of birds-of-paradise. Bull. Br. Oolog. Assoc., vol. 3, pp. 2-3. (List of 31 sp. and ssp. of birds of paradise and bowerbirds, the eggs of which were exhibited. Nest of *Cicinnurus* described.)
770. 1930f. On the eggs of *Cicinnurus regius*. Bull. Br. Oolog. Assoc., vol. 3, p. 2.
771. 1931a. Notes on Paradisaeidae with a list of the species, subspecies, and hybrids exhibited at the Seventh International Ornithological Congress. Proc. Int. Orn. Cong. 7. Amsterdam, 1930, pp. 285-298. (Characters of family and list.)
772. 1931b. A preliminary review of the Mooruk (*Papuanus bennetti*) group of cassowaries. Novit. Zool., vol. 36, pp. 181-183. (Systematic status of *Casuarius bennetti* group. 2 col. pls.)
773. 1931c. On a collection of birds made by Mr. F. Shaw-Mayer in the Weyland Mountains, Dutch New Guinea in 1930. Novit. Zool., vol. 36, pp. 250-276. (Annot. list of specimens from Gebroeders Ra. 11 spp. described, 2 pls.)
774. 1931d. Note on nomenclature. Bull. Br. Orn. Club, vol. 51, p. 68. (*Coracina* must replace *Grauculus*; reply to Mathews [see no. 545].)
775. 1931e. A new subspecies: *Trugon terrestris mayri*. Bull. Br. Orn. Club, vol. 51, p. 69.
776. 1931f. Two hitherto undescribed eggs. Bull. Br. Orn. Club, vol. 52, p. 37. (*Pitohui ferrugineus brevipennis* and *Paradisaea rubra*.)
777. 1932a. Notes on three cassowaries. Bull. Br. Orn. Club, vol. 52, pp. 82-83. (*Casuarius jamrachi*, *C. doggetti* and *C. hagenbecki* are considered to be from Admiralty Is. [= ?*C. ben-*
- netti papuanus*, ?*C. u. unappendiculatus* and ?*C. c. tricarunculatus*, respectively].)
778. 1932b. On *Casuarius unappendiculatus rufotinctus*. Bull. Br. Orn. Club, vol. 53, p. 238. (Considered distinct by author [now = *C. u. aurantiacus*].)
779. 1932c. On a new bird of paradise. Ann. Mag. Nat. Hist., vol. 10, p. 126. (*Lophorina feminina lehuni* [= *L. superba feminina*].)
1936. See no. 926.
780. 1937. Two new cassowaries. Bull. Br. Orn. Club, vol. 57, pp. 120-121. (Describes *Casuarius papuanus shawmayeri* [= *C. bennetti shawmayeri*] and *C. casuarius grandis* [= *C. c. bistriatus*].)
1938. See no. 439 for memoriam.
Rothschild, Lord W., and E. Hartert
781. 1915. Notes on Papuan birds. Novit. Zool., vol. 22, pp. 46-60. (On specimens of birds of prey, finches, thrushes, and hornbills. Part of a series of publications in pre-1915 Novit. Zool., for introduction of which see Novit. Zool. 1901, pp. 55-61.)
782. 1916. On a new *Monarcha* from Rossel Island. Novit. Zool., vol. 23, p. 297. (*M. cinerascens rosselianus*. See also no. 784.)
783. 1917. Review of the forms of *Lalage karu* inhabiting the Papuan subregion. Bull. Br. Orn. Club, vol. 37, pp. 15-17. (*L. k. pallescens* [= *L. leucomela pallescens*] of Louisiade Archipel. described. See also no. 618.)
784. 1918a. A few additional notes on the birds of Rossel Island, Louisiade Group. Novit. Zool., vol. 25, pp. 311-312. (Systematic notes on specimens. See also no. 782.)
785. 1918b. Further notes on the birds of Sudest, or Tagula, Island in the Louisiade Group. Novit. Zool., vol. 25, pp. 313-326.
786. 1922. *Tanysiptera danae intensa* subsp. nov. Bull. Br. Orn. Club, vol. 42, p. 91. (*T. danae* is now considered monotypic.)

787. 1929a. Note on *Manucodia ater alter* and a new subspecies. Bull. Br. Orn. Club, vol. 49, pp. 109-110.
(Largely description of *M. ater sub-alter*.)
788. 1929b. *Ailuroedus buccoides* and its subspecies. Novit. Zool., vol. 35, p. 59.
(*A. b. moleatus* [= *A. b. geislerorum*] described.)
- Rothschild, Lord W., E. Stresemann, and K. Paludan
789. 1932. Ornithologische Ergebnisse der Expedition Stein 1931-1932: 1. Waigeu, Numfor, Japen. Novit. Zool., vol. 38, pp. 127-247.
(Subts. = 1. Die Vögel von Waigeu [pp. 127-188, Rothschild dealing with Paradisaeidae, Psittaci, Ralli and Stresemann and Paludan the remaining groups]; 2. Die Vögel von Numfor [pp. 188-207, Rothschild dealing with Psittaci and Stresemann and Paludan the remaining groups]; 3. Die Vögel von Japen [= Jobi, pp. 207-247, Rothschild dealing with Paradisaeidae, Psittaci and Stresemann and Paludan the remaining groups].)
- Rowley, I.
790. 1967. A fourth species of Australian Corvid. Emu, vol. 66, pp. 191-219.
(Gives taxonomic history of *C. orru* and discusses reasons why it is the same as *C. ceciliae* of Aust.)
791. 1969. The Little Black Cormorant *Phalacrocorax sulcirostris* in Papua and New Guinea. Emu, vol. 69, pp. 116-117.
(A record with brief review of previous published sightings.)
792. 1970. The use of mud in nest-building—a review of the incidence and taxonomic importance. Ostrich, Suppl. 8, pp. 139-148.
(Brief ref. to unique use of mud by the N.G. *Monachella muelleriana*.)
793. 1974. Bird life. Sydney and London. Collins. 284 pp.
(Odd mention of N.G. birds, particularly concerning migrants from Aust. 68 photos., 31 in color, 26 figs.)
- Rutgers, A.
794. 1970. Birds of New Guinea, by John Gould. London. Methuen. 321 pp.
(160 of the original col. pls. from Gould's 1875-1888 work reproduced but much reduced in size and quality. Popular, rather poor, text by Rutgers replaces the original. Incl. some birds not found in N.G. See also nos. 814, 1017.)
- Ryan, P. A. (ED.)
795. 1972. Encyclopedia of Papua and New Guinea. Melbourne, Univ. Press. 3 vols.

S Y S T E M A T I C C R O S S - R E F E R E N C E T O B I B L I O G R A P H Y

The purpose of this cross-reference to systematic content of the publications within the bibliography is to provide a fundamental guide to the working ornithologist. It is completely outside the scope and aim of this work to comprehensively cross-reference the avian taxa dealt with in the literature of the bibliography. In the case of larger, more comprehensive, works therein this would mean that the publication number would appear against the name of almost every species found in the Papuan Sub-region. Moreover, the result of such an analysis of the literature would almost constitute the groundwork for a handbook to the birds of the area.

In the following incomplete systematic list I have given reference by publication numbers to those publications which deal exclusively or predominantly with particular taxa, and to those publications that have certain taxa mentioned by name in their title and/or annotations. It is hoped that this will prove of some use to the working ornithologist wishing to quickly find a "lead" into the literature of specific taxa. Those workers wishing to find full reference to publications describing new taxa should consult Mayr's 1941 list (no. 580) or, for names erected since Mayr's list, the pages directly following this systematic cross-reference section. For convenience, family names are included for all taxa dealt with although the family as a whole may not necessarily have reference made to it.

Very generalized though this systematic cross-reference system is, it does provide a fairly clear indication of the remarkably uneven literature coverage of families of New Guinea birds during the period 1915 to 1976. Most obviously repeatedly worked are the Casuariidae, Megapodiidae, Psittacidae, and of course the Paradisaeidae and Ptilonorhynchidae; all of which have attracted much ornithological study for very many years. Particularly in recent years the Columbidae and Alcedinidae, two families extremely well represented in New

Guinea, have begun to attract attention. A number of endemic genera and species such as *Ifrita*, *Malurus alboscipulatus*, *Todopsis*, and *Paramythia* are also subjects of more recent and current studies. It is hoped that the rapidly increasing interest in Papuan ornithology will bring about more detailed studies of some of the lesser known taxa, as well as further work on the better known ones. Once again, for consistency, nomenclature used is that of the Rand and Gilliard Handbook (1967).

BIRDS DESCRIBED FROM THE PAPUAN SUBREGION SINCE 1940

The following birds have been described subsequent to the closing date of manuscript (December 31, 1940) of Mayr's classic *List of New Guinea Birds*, with the exception of a number of birds described in 1941 by Rand (see no. 718). The new name and its author(s) are given and are followed in square brackets by the name used by Rand and Gilliard, in their *Handbook of New Guinea Birds* (no. 726), where this differs from the original name. Names so placed in square brackets do not necessarily reflect my personal nomenclatural preference, however, but are provided for consistency within this work, and for the convenience of working ornithologists using Rand and Gilliard.

Author(s) name is followed by the bibliography number of the publication concerned. The distributional range is provided only for those species not included in Rand and Gilliard's book, as ranges are provided in their work. It should be noted that compilation for Rand and Gilliard's book terminated by 1964.

Podiceps novaehollandiae incola Mayr 584

Notophoyx novaehollandiae austera Ripley 742

Range: Central mountains (Balim Valley), south and south-east New Guinea.

Butorides striatus flyensis Salomonsen 804

Range: Setekwa R. east to Port Moresby district.

Aythya australis papuana Ripley 742

Range: Lake Habbema and the Balim Valley west to the Wissel Lakes, 5000 ft. and higher.

Elanus caeruleus wahgiensis Mayr and Gilliard 607

Aviceda subcristata obscura Junge 445

Aepypodium arfakianus misoliensis Ripley 678

Excalfactoria chinensis novaeguineae Rand 719

Synoicus ypsilophorus lamonti Mayr and Gilliard 603

Turnix maculosa furva Parkes 691

Turnix maculosa giluwensis Sims 851

Turnix maculosa mayri Sutter 932

Rallus pectoralis connectens Junge 442

Rallus philippensis wahgiensis Mayr and Gilliard 603

Rallus philippensis randi Mayr and Gilliard 603

Porzana pusilla mayri Junge 442

Porzana tabuensis edwardi Gyldenstolpe 353

Rallicula rubra telefolminensis Gilliard 319

Rallicula mayri carmichaeli Diamond 218

Range: Mt. Menawa, Bewani Mts. and Mt. Nibo, Torricelli Mts., above 4400 ft.

Rallina tricolor maxima Mayr 589

Fulica atra anggiensis Thompson and Temple 943

[=*Fulica atra* subspecies (?) of R and G.]

Range: Lake Anggi Gidjii, Arfak Mts., Irian Jaya.

Ptilinopus viridus pseudogeelvinkianus Junge 442

Ducula rufigaster pallida Junge 442

Ducula pacifica sejuncta Amadon 6

Range: Ninigo and Hermit Is., Bismarck Arch., and Seleo and Tarawai, off n. central N.G.

Goura cristata pygmaea Mees 640

Range: Misol I.

Goura scheepmakeri wadai Yamashina 995

[=*Goura scheepmakeri sclaterii*.]

Eos squamata attenua Ripley 739

Trichoglossus haematocephalus berauensis Cain 146

Domicella lory somu Diamond 215

Range: Karamui Basin and the immediate south; and from Port Romilly, Purari R.

Micropsitta keiensis sociabilis Greenway 347

Range: Batanta, Western Papuan Is.

Psittacella picta excelsa Mayr and Gilliard 603

Psittacella modesta subcollaris Rand 718

Psittacella modesta hallstromi Mayr and Gilliard 603

(Note that *Psittacella modesta hallstromi* is a misprint for *Psittacella madaraszi hallstromi*.)

Tyto capensis baliem Ripley 742

Range: Balim Valley, 4500-5000 ft.

Aegotheles bennettii terborghi Diamond 215

Range: Karimui, Eastern Highlands District, Papua N.G.

Aegotheles wallacii manni Diamond 218

Range: Mt. Menawa and Mt. Turu, North Coastal Range.

Collocazia whiteheadi nuditarsus Salomonsen 802

Range: Southern and south-east N.G., Mt. Goliat, Kubor Mts. and Baroka. (Somadikarta, no. 863, tentatively treats *nuditarsus* as a full species.)

Edolisoma melan batantae Gyldenstolpe and Mayr 354

[=*Coracina melaena batantae*.]

- Coracina tenuirostris numforana* Mayr (in Peter's check-list, vol. 9, 1960).
- Coracina montana bicinia* Diamond 218
Range: Torricelli, Bewani and Cyclops Mts.; medium elevations, above ca. 2700 ft.
- Saxicola caprata wahgiensis* Mayr and Gilliard 603
- Turdus poliocephalus carbonarius* Mayr and Gilliard 603
[=*Turdus poliocephalus erebus*.]
- Turdus poliocephalus erebus* Mayr and Gilliard 605
(New name for preoccupied *Turdus poliocephalus carbonarius*.)
- Melampitta lugubris longicauda* Mayr and Gilliard 605
- Craterocelis murina fumosa* Ripley 739
- Eupetes castanotous gilliardi* Greenway 347
Range: Mt. Besar, 2800 ft.; Batanta, Western Papuan Is.
- Eupetes leucostictus menawa* Diamond 218
Range: Mt. Menawa, Bewani Mts., above 4100 ft.
- Malurus alboscapulatus kutubu* Schodde and Hitchcock 818
Range: Southern Highlands of N.G. from 750 to 2160 m.
- Megalurus timoriensis wahgiensis* Mayr and Gilliard 603
- Megalurus timoriensis montanus* Mayr and Gilliard 603
- Sericornis spilodera intermedia* Greenway 347
Range: Mt. Besar, 1500-3000 ft.; Batanta, Western Papuan Is.
- Sericornis virgatus boreonesioticus* Diamond 218
Range: Bewani, Torricelli and Prince Alexander Mts., 2100-4800 ft.
- Sericornis nigroviridis* Miller 653
- Gerygone magnirostris occasa* Ripley 739
- Phylloscopus trivirgatus paniaiae* Junge 442
- Rhipidura leucothorax clamosa* Diamond 215
Range: Karimui Basin and area immediately to south.
- Monarcha juliana* Ripley 740
- Tregellasia leucops wahgiensis* Mayr and Gilliard 605
- Peneothello sigillatus hagenensis* Mayr and Gilliard 605
- Pachycare flavogrisea randi* Gilliard 319
- Pachycephala soror remota* Mayr and Van Deusen 621
- Pachycephala modesta telefolminensis* Gilliard and LeCroy 322
- Pitohui kirchocephalus carolinae* Junge 442
- Pitohui kirchocephalus adiensis* Mees 636
Range: Adi I., off south coast of the Onin Penin.
- Pitohui ferrugineus fuscus* Greenway 347
Range: Batanta, Western Papuan Is.
- Artamus maximus wahgiensis* Gyldenstolpe 353
[=*Artamus maximus*.]
- Phonygammus keraudrenii mayri* Greenway 346
- Phonygammus keraudrenii adelberti* Gilliard and LeCroy 324
[=*Phonygammus keraudrenii* subspecies ? of R and G.]
- Epimachus fastosus ultimus* Diamond 218
Range: Mt. Menawa, Bewani Mts., above 4500 ft.
- Epimachus meyeri bloodi* Mayr and Gilliard 603
- Epimachus meyeri megarhynchus* Mayr and Gilliard 603
- Astrapia splendidissima elliot-smithi* Gilliard 319
- Astrapia recondita* Kuroda 474
[=*Astrapia mayeri*.]
- Astrachia barnesi* Iredale 430
[=*Astrapia mayeri* X *A. stephaniae* hybrid.]
- Parotia carolae clelandiae* Gilliard 319
- Parotia lawesi exhibita* Iredale 430
(This ssp. not included by R and G; but subsequently accepted by Gilliard, no. 321.)
- Lophorina superba addenda* Iredale 430
(This ssp. not included by R and G; but subsequently accepted by Gilliard, no. 321.)
- Diphylloides magnificus extra* Iredale 431
[=*Diphylloides magnificus hunsteini*.]
- Paradisaea rudolphi margaritae* Mayr and Gilliard 603
- Paradisaea bloodi* Iredale 430
[=*Paradisaea rudolphi* X *P. raggiana* hybrid.]
- Pteridophora alberti hallstromi* Mayr and Gilliard 603
- Cnemophilus macgregorii sanguineus* Iredale 430
- Cnemophilus macgregorii kuboriensis* Mayr and Gilliard 607
- Archboldia papuensis sanfordi* Mayr and Gilliard 602
- Amblyornis macgregoriae kombok* Schodde and McKean 823
Range: Kubor, Mt. Hagen and Bismarck Ranges, central Papua N.G.
- Amblyornis macgregoriae nubicola* Schodde and McKean 823
Range: Eastern Owen Stanley Range.
- Ailuroedus buccoides cinnamomeus* Mees 636
Range: Southern N.G. from the Mimika R. to Fly R.
- Daphoenositta miranda kuboriensis* Mayr and Gilliard 605
- Neositta papuensis intermedia* Junge 442
- Neositta papuensis wahgiensis* Glydenstolpe 353
- Nectarinia sericea mariae* Ripley 740
- Nectarinia sericea veronica* Mees 639
Range: Liki I., Koemamba Is., off north Irian Jaya coast.

- Cinnyris sericea bergmanii* Gyldenstolpe 354
[=*Nectarinia sericea sericea*.]
- Oedistoma pygmaeum waigeuense* Salomonsen 803
Range: Waigeu I., Western Papuan Is.
- Oedistoma pygmaeum flavipectus* Salomonsen 803
Range: Southern N.G. from Etna Bay to Milne Bay.
- Oedistoma pygmaeum olivascens* Salomonsen 803
Range: Northern coast of southeastern N.G., from Milne Bay to Huon Penin.
- Myzomela eques karimuiensis* Diamond 215
Range: Karimui, Eastern Highlands District, N.G., 3650 ft.
- Myzomela rosenbergii wahgiensis* Gyldenstolpe 353
- Melilestes megarhynchus brunneus* Salomonsen 803
Range: Misol and Salawati Is., Vogelkop and Onin Penin., and Weyland Mts.
- Melidectes fuscus gilliardi* Salomonsen 803
Range: Bismarck Mts., eastern N.G.
- Melidectes princeps* Mayr and Gilliard 603
- Melidectes rufocrissalis gilliardi* Diamond 215
[=*Melidectes rufocrissalis thomasi*.]
Range: Southern slopes of Eastern Highlands from Okapa to Mt. Karimui, 4200-8000 ft.
- Melidectes rufocrissalis thomasi* Diamond 218
(New name for preoccupied *Melidectes rufocrissalis gilliardi*.)
- Meliphaga obscura viridifrons* Salomonsen 803
[=*Oreornis obscurus*.]
Range: Mts. of Vogelkop Penin., north-western Irian Jaya.
- Xanthotis chrysotis austera* Ripley 739
- Meliphaga flaviventer tararae* Salomonsen 803
[=*Xanthotis chrysotis* subspecies (?) of R and G.]
Range: Southern coastline of N.G., between middle and lower Fly R. westward to about Digul R.
- Meliphaga versicolor vulgaris* Salomonsen 803
[=*Meliphaga virescens sonoroides*.]
Range: Japen I., coastal zone of north N.G. from Geelvink Bay to Huon Gulf; Fergusson I.
- Meliphaga montana gretae* Gyldenstolpe and Gilliard 353
- Meliphaga montana margaretae* Greenway 347
Range: Mt. Besar, Batanta I., 1900-3050 ft.
- Meliphaga mimikae bastille* Diamond 215
Range: Karimui Basin, area immediately to the south, and the Osaka forests, between 2000 and 4200 ft.
- Meliphaga mimikae rara* Salomonsen 803
[=*Meliphaga mimikae* subspecies (?) of R and G.]
Range: From the type specimen only: at Bernhard Camp, Idenburg R., north-western N.G.
- Meliphaga analoga papuae* Salomonsen 803
[=*Meliphaga analoga* subspecies (?) of R and G.]
Range: Southern N.G. from Fly R. district eastward to Hall Sound.
- Meliphaga analoga connectens* Salomonsen 803
[=*Meliphaga analoga* subspecies (?) of R and G.]
Range: Lowlands of northern N.G. from Wewak eastward to Huon Gulf.
- Ptiloprora guisei incerta* Junge 442
Range: Bobairo, Wissel Lake district.
(Not accepted by R and G; and considered by Salomonsen, in Peter's check-list, vol. 12, 1967, to probably be a hybrid *Ptiloprora erythropleura* X *P. perspicillata*.)
- Ptiloprora mayri acrophila* Diamond 218
Range: Mt. Menawa, Bewani Mts., Sepik District, 4200-6185 ft.
- Pycnopygius ixoides cinereifrons* Salomonsen 803
Range: Southern N.G. from Mimika R. eastward to upper Fly R.
- Philemon novaeguineae fretensis* Salomonsen 803
[=*Philemon novaeguineae* subspecies (?) of R and G.]
Range: Southern N.G. from Middle Fly R. eastward along south coast of southeastern N.G. to Milne Bay.
- Philemon novaeguineae trivialis* Salomonsen 803
[=*Philemon novaeguineae* subspecies (?) of R and G.]
Range: Northern coast of southeastern N.G., known from Collingwood Bay and Kumusi R.
- Dicaeum pectorale ignotum* Mees 636
Range: Gebe I., Western Papuan Is.
- Dicaeum geelvinkianum obscurifrons* Junge 442
- Melanocharis striativentris albicauda* Mayr and Gilliard 605
[=*Melanocharis striativentris prasina*.]
- Rhamphocarhis crassirostris interposita* Mees 638
Range: Type specimen only, at Bivak 39a, Antares, Star Mts., 1500 m.
- Oreocaris arfaki bloodi* Gyldenstolpe 353
(R and G. consider species best treated as monotypic until validity of *bloodi* confirmed.)
- Paramythia montium brevicauda* Mayr and Gilliard 607
- Paramythia montium alpinum* Salomonsen 801
[=*Paramythia montium olivaceum*.]
- Paramythia montium occidentis* Mees 638
Range: Hellwig Mts., (Oranje Range) 2400-2500 m.
- Zosterops novaeguineae wahgiensis* Mayr and Gilliard 603.

Zosterops novaeguineae shaw-mayeri Mayr and Gilliard 603
 [=*Zosterops novaeguineae wahgiensis.*]]
Zosterops novaeguineae aruensis Mees 628
Zosterops novaeguineae magnirostris Mees 629

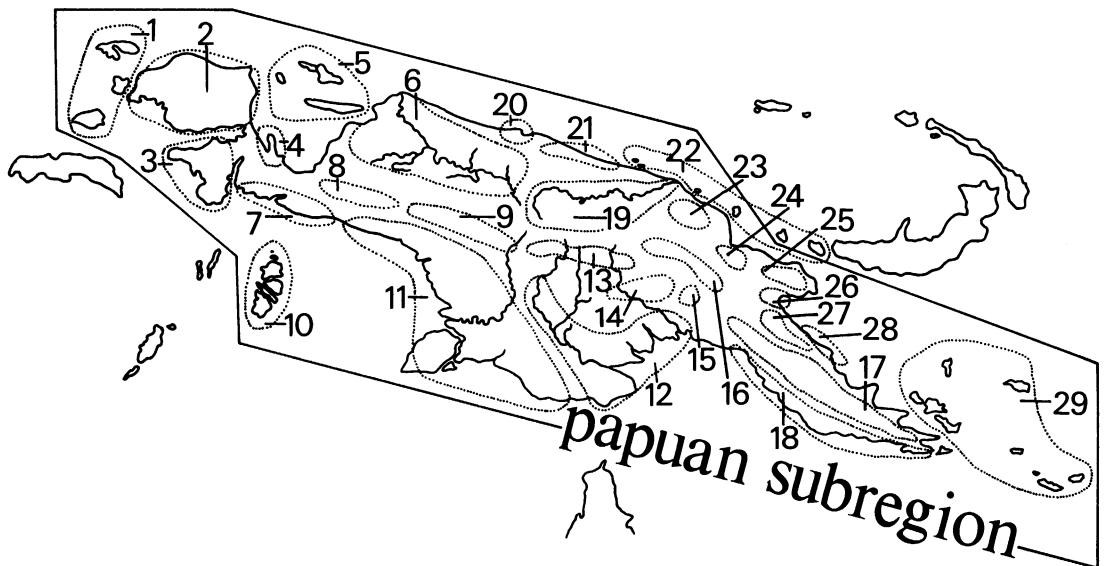

FIG. 1 Map of the Papuan Subregion showing the areas used in the geographical cross-reference to literature content. Numbers indicating the stippled areas are those of the following geographical list (after Gilliard, 1969).

GEOGRAPHICAL CROSS-REFERENCE TO BIBLIOGRAPHY

Cross-reference, by publication number, is here provided to publications dealing exclusively or very predominantly with the avifauna of areas within certain subregions of the Papuan Subregion. The numbered subregions (fig. 1) are predominantly those defined by Gilliard for his analysis of "Expedition Summaries" in his posthumous and last contribution, *Birds of Paradise and Bower Birds* (no. 321). For present purposes, however, I have added three subregions to those of Gilliard and enlarged the area of three others. The resultant subregions are indicated in figure 1. It is hoped that this rather generalized, geographical analysis of the literature subject content will enable the ornithologist working on a particular area of New Guinea to at least quickly locate some of the more significant and comprehensive publications dealing with it.

As in the systematic cross-reference section of this work, this geographical cross-reference to the literature enables one to gain some idea of the relative ornithological work coverage

during the period 1915 to 1976. This, together with Gilliard's "Expedition Summaries" mentioned above, provides some indication of the "geographical gaps" still existing and of which areas may prove rewarding to the ornithological explorer.

Note that additional publications dealing with the birds of certain areas of Papua New Guinea are referred to in part six, directly following this section.

1. Western Papuan Islands.
11, 226, 347, 354, 601, 610, 611, 640, 643, 650, 651, 736, 739, 740, 741, 742, 789, 840, 866, 927
2. Vogelkop.
11, 15, 175, 326, 354, 380, 381, 415, 416, 419, 477, 490, 552, 564, 601, 610, 633, 732, 736, 840, 942, 943
3. Bombarai Peninsula.
354
4. Wandammen Region.
354, 380, 381, 552
5. Islands of Geelvink Bay.
445, 567, 609, 733, 736, 789, 840

6. North-western Lowlands.
97, 481
7. Triton Bay—Etna Bay Region.
443
8. Nassau—Weyland Mt. Region.
442, 443, 675, 676, 742, 753, 773, 825, 866,
925, 926, 937, 996
9. Oranje, Snow and Star Ranges.
40, 43, 127, 134, 135, 340, 440, 441, 558, 570,
638, 675, 676, 713, 715, 717, 718, 721, 742,
948
10. Aru Islands.
226, 628, 702, 797, 987, 991
11. Merauke Region.
52, 98, 416, 440, 441, 504, 638, 904, 916, 928,
961, 995
12. Fly River and Delta Region.
42, 62, 70, 82, 126, 232, 363, 519, 709, 710,
711, 718, 720, 725, 818, 857, 949
13. Dap, Hindenburg, Victor Emanuel Ranges.
307, 312, 318, 319, 322, 494, 606, 709, 710,
711
14. Tari, Giluwe, Hagen Mts.
25, 28, 29, 31, 33, 36, 37, 64, 95, 137, 138,
139, 169, 199, 208, 227, 297, 299, 303,
304, 305, 306, 359, 362, 506, 516, 602,
603, 605, 607, 830, 977, 981, 994
15. Kubor Mts.
227, 303, 304, 305, 306, 407, 603, 605, 607
16. Regenberg, Lordberg, Schraderberg, Wahgi Di-
vide, Bismarck and Kratke Mts., and Mt.
Michael.
140, 170, 199, 214, 215, 224, 227, 233, 303,
304, 305, 306, 325, 353, 387, 388, 389,
398, 603, 605, 607, 852, 860, 938, 963
17. Mountains of South-eastern New Guinea.
41, 88, 92, 128, 130, 151, 164, 166, 180, 181,
18. Lowlands of South-eastern New Guinea.
31, 33, 39, 67, 74, 75, 128, 129, 199, 302,
390, 394, 396, 399, 400, 402, 517, 520,
617, 626, 647, 690, 696, 802, 831, 931,
949, 968, 976
19. Sepik River Region.
307, 312, 323, 494, 505, 601, 629, 692, 881,
886, 930, 994
20. Cyclops Mts., Lake Sentani and Hollandia coast
area.
15, 156, 380, 381, 552, 584, 742
21. Torricelli Mts., Wewak, Prince Alexander Mts.
216, 217, 218, 424
22. Islands bordering northern coast.
31, 33, 219, 220, 221, 223, 226, 229, 230, 343,
471
23. Adelbert Mts.
56, 324, 492
24. Astrolabe Bay Region and inland lowlands of
Ramu River.
56, 601
25. Mts. of Huon Peninsula.
435, 457, 562, 565, 952
26. Lae-Huon Gulf region.
153, 344, 435, 601, 731, 968
27. Herzog Mt. Region, including Wau and Bulolo
areas.
148, 199, 344, 345, 562, 565, 635, 654, 658,
931, 968
28. Morobe coast area.
654
29. Islands off South-eastern New Guinea.
83, 128, 129, 226, 537, 613, 621, 782, 784,
785, 870, 986

**PAPUA NEW GUINEA LOCALITIES FOR WHICH BIRD SPECIES LISTS HAVE BEEN
PUBLISHED IN THE NEW GUINEA BIRD SOCIETY NEWSLETTER
NUMBERS 1 TO 131, 1965-1977**

A most significant recent event in the history of New Guinea ornithology was the commencement in December 1965 of monthly publication of the New Guinea Bird Society Newsletter (issued as the New Guinea Bird Society Circular for the first seven numbers and changed to the Papua New Guinea Bird Society Newsletter with no. 146, August 1978), published by the Papua New Guinea Bird Society in Port Moresby. This small publication has appeared almost

every month since then and contains a wealth of information of much significance to the Australasian ornithologist. The Papua New Guinea Bird Society membership has, ever since its formation, included a number of well-informed amateurs as well as a few professional ornithologists and/or zoologists. The Society membership has, therefore, steadily brought the newsletter to a high standard of ornithological information content, which now represents an

important source that no person or institute the least interested in the avifauna of New Guinea can afford to do without.

In addition to the large number of Papua New Guinea Bird Society Newsletter titles included in the bibliography section of this work, a good deal of data exist in the publication which is in a form unsuitable for inclusion in the author bibliography for various reasons, such as lack of a title and/or author. Usually these constitute brief reference to a few, or a single, species at a particular locality (some of which represent new or interesting distributional or breeding records). Others, however, consist of brief to lengthy locality species lists which, save a few that include brief notes on status or habits, constitute no more than a list of names. Whilst these lists have not been included in the bibliography, and as a result are not referred to in the "geographical cross-reference," I list them here alphabetically by locality for completeness. Note that the great majority of these bird lists are for localities within a day's return trip from Port Moresby, and are the result of observations by a number of society members and are thus published anonymously. Others, however, are for localities farther from Port Moresby and these are usually authored, in which case I have indicated so in parentheses before the newsletter number and pagination.
