## A NEW NAME FOR *BASILEUTERUS* *CULICIVORUS RORAIMAE* ZIMMER AND PHELPS

BY JOHN T. ZIMMER AND WILLIAM H. PHELPS

In their recent paper, "Four new subspecies of birds from Venezuela" (January 19, 1949, Amer. Mus. Novitates, no. 1395, p. 7), the authors inadvertently used the name "*roraimae*" for a new subspecies of *Basileuterus culicivorus*, overlooking the prior *Basileuterus roraimae* Sharpe (1885, Catalogue of the birds in the British Museum, vol. 10, p. 392). The error was discovered too late to permit correction before the publication of the paper in question.

Since the homonymy requires the proposal of a new name for the later-described bird, we suggest the following:

***Basileuterus culicivorus segrex***, new name for *Basileuterus culicivorus roraimae* Zimmer and Phelps, 1949, *loc. cit.*

In the same discussion, *B. c. olivaceus* should, of course, be corrected to read *B. c. olivascens*.
